

Immutable trust in quant

We **prove** that your quant investment models are accurate & trustworthy

BLOCKCHAIN VERIFIED

Can you trust quant?

Quantitative models drive the majority of today's trade volume:

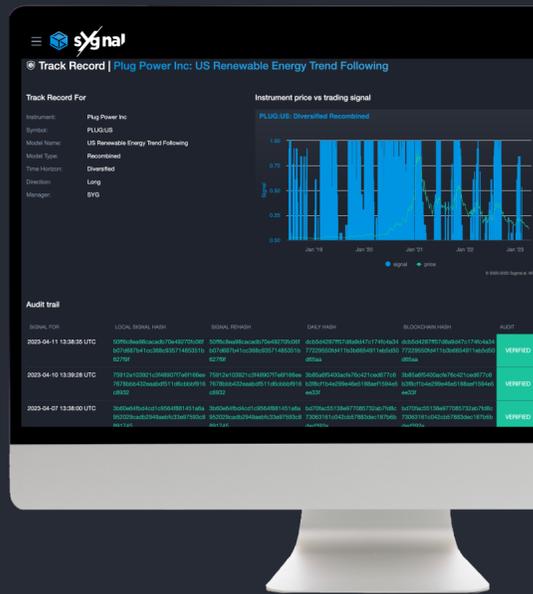

And yet, anyone can create a model that perfectly fits the curves ex-post, which **will not work ex-ante**.

What we do

SYGNAL offers an **independent** auditing service for quantitative investment data.

We automate much of auditing process for a **fraction of the cost** of traditional firms, allowing end-users to **quickly & accurately** verify any track record.

Our solutions benefit

Funds & quant managers

- ✓ **Dramatically reduce** third-party auditing costs
- ✓ **Attract capital** from institutional investors
- ✓ **Improve** sales lead times

Investors

- ✓ **Verify** the accuracy of a quantitative model's track record
- ✓ **Gain trust** in the information upon which they base their investment decisions

SYGNAL by the numbers

+220 Million

Quantitative signals stored

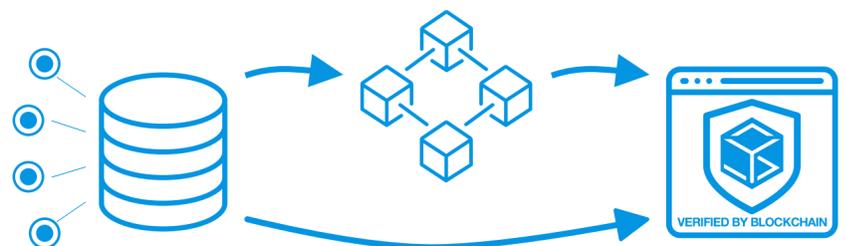

+10,000

Instruments processed daily

+65,000

Audited track records

How it works

Collect, hash, and store **quantitative signal data**

Render data **immutable** by publishing it on the blockchain

Provide tools to **verify & audit** data and track records

About us

SYGNAL is owned and operated by **Sanostro**, a Swiss-based financial data service & technology firm founded in 2011.

Sanostro is supervised by SRO-VQF in Switzerland, and the SEC in the United States.
